Lab 2.3

Yan Guanyu

2022-06-07

Basic Commands

```
x <- c(1, 3, 2, 5)
x
```

```
## [1] 1 3 2 5
```

```
x = c(1, 6, 2)
y = c(1, 4, 3)
x
```

```
## [1] 1 6 2
```

```
length(x)
```

```
## [1] 3
```

```
length(y)
```

```
## [1] 3
```

```
x + y
```

```
## [1]  2 10  5
```

ls() function is used to check a list of all of the saved objects, such as data and functions.

rm() function is used to remove objects

```
ls()
```

```
## [1] "x" "y"
```

```
rm(x,y)
ls()
```

```
## character(0)
```

Remove all objects at once:

```
rm(list = ls())
```
